20-22 April 2015

BACKGROUND

Single parameter characterisation of the crack/notch tip field using fracture mechanics parameters like K , J or CTOD has been extremely powerful in advancing predictive technologies for critical or sub-critical crack growth. It has also become clear over the last 40 years that single parameter approaches have limitations particularly in dealing with crack growth phenomena arising from crack tip shielding, often resulting from the plastic enclave surrounding a crack. Influences of this enclave on the crack tip stress field ahead of the crack are maximised during cyclic loading. In the case of a parameter like stress intensity factor, K , which characterises the crack tip field via an elastic approximation, it is not surprising that any set of plasticity-induced circumstances which perturb the size of the plastic enclave and its associated strain field lead to predictive difficulties. Over the last 30 years, notable areas of activity related to such difficulties include short cracks, plasticity-induced closure, variable amplitude and multiaxial loading and notch effects.

Thus an increasing number of authors and research groups, particularly in Europe, are working on the topic of characterisation of crack tips using more than one fracture mechanics parameter. Attention has been directed, for example, towards incorporating the T-stress into life prediction methods. The T-stress is the second term in a Williams-type expansion of the crack tip stresses and it affects the extent and shape of crack tip plasticity. It would therefore be expected to be influential in plasticity-related crack growth phenomena and a number of publications have demonstrated this to be true. The situation is further complicated where a crack experiences multiaxial loading and Mode II and III fracture mechanics parameters are also necessary. Alongside this, new analytical models have been proposed and advanced experimental techniques allow greatly improved measurement of 2D and 3D fields associated with the crack tip zone.

Very successful workshops on this topic have been held in Forni di Sopra, Udine, Italy in March 2011 and Málaga, Andalusia, Spain in April 2013.

The organisers of this unique workshop believe that crack tip characterisation under load will benefit from opportunities for invited research scientists and engineers to present and exchange new data and cutting edge ideas related to characterisation of crack/notch tip fields in an informal, interactive format at a conference venue in a beautifully scenic Italian city.

VIDEO-PRESENTATIONS

Presentation title	Authors	DOI
Spherical particles formation under biaxial cyclic loading due to mesotunneling effect	A. Shanyavskiy	https://doi.org/10.53255/IGFTUBE.WS2015_A.1
Stain mapping the fracture process zone in a heterogeneous brittle material (polygranular graphite) by synchrotron X-ray diffraction, computed tomography and image correlation	L. S. Mora, S. Barhli, D. Collins, M. Mostafavi, C. Reinhard, Y. Verityagina, T.J. Marrow	https://doi.org/10.53255/IGFTUBE.WS2015_A.2
Stress intensity factor and the effect of plastic dissipation in heat at the crack tip of a fatigue propagating crack	T. Palin-Luc, N. Ranc	https://doi.org/10.53255/IGFTUBE.WS2015_A.3
Synchrotron 3D characterization of arrested fatigue cracks initiated from small tilted notches in steel	P. Lorenzino, J.Y. Buffiere, S. Okazaki, H. Matsunaga, Y. Murakami	https://doi.org/10.53255/IGFTUBE.WS2015_A.4
Three dimensional effects on cracked components under anti plane loading	F. Berto, A. Campagnolo, L. P. Pook	https://doi.org/10.53255/IGFTUBE.WS2015_A.5
2D mapping of plane stress crack tip fields following an overload	P.J. Withers, P. Lopez Crespo, M. Mostafavi, A. Steuwer, J.F. Kelleher, T. Buslaps	https://doi.org/10.53255/IGFTUBE.WS2015_A.6
3D Analyses of Crack Propagation in Torsion	D. Shiozawa, I. Serrano Munoz, S. Dancette, C. Verdu, J.Y. Buffiere	https://doi.org/10.53255/IGFTUBE.WS2015_A.7
3D thickness effects around notch and crack tip stress/strain fields	R.C.O. Goes, J.T.P. Castro, M.A. Meggiolaro	https://doi.org/10.53255/IGFTUBE.WS2015_A.8
A numerical study of non linear crack tip parameters	F.V. Antunes, R. Branco, L. Correia, A.L. Ramalho	https://doi.org/10.53255/IGFTUBE.WS2015_A.9
A quantitative threedimensional in situ study of a short fatigue crack in a magnesium alloy	M. Mostafavi, T. Hashimoto, G.E. Thompson, T.J. Marrow	https://doi.org/10.53255/IGFTUBE.WS2015_A.10

Presentation title	Authors	DOI
Can deltaKeff be assumed as the driving force for fatigue crack growth?	J.T.P. Castro, M.A. Meggiolaro, J.A.O. Gonzalez	https://doi.org/10.53255/IGFTUBE.WS2015_A.11
Characteristic Dimension of Crack Tip for Very-High-Cycle Fatigue of high strength steels	Y. Hong	https://doi.org/10.53255/IGFTUBE.WS2015_A.12
Crack tip fields and mixed mode fracture behavior of progressively drawn pearlitic steel	J. Toribio, B. Gonzalez, J.C. Matos	https://doi.org/10.53255/IGFTUBE.WS2015_A.13
Damage Evolution in Freeze Cast Metal/Ceramic composites exhibiting lamellar microstructures	C. Simpson, T. Lowe, P.J. Withers, S. Roy, A. Wanner	https://doi.org/10.53255/IGFTUBE.WS2015_A.14
Effective stress assessment at rectangular rounded lateral notches	E. Maggiolini, R. Tovo, P. Livieri	https://doi.org/10.53255/IGFTUBE.WS2015_A.15
Estimation of the crack propagation direction in a mixedmode geometry via multi-parameter fracture criteria	L. Malikova, V. Vesely, S. Seitl	https://doi.org/10.53255/IGFTUBE.WS2015_A.16
Experimental evaluation of plasticity-induced crack shielding from crack tip displacement fields	J. M. Vasco-Olmo, F.A. Diaz	https://doi.org/10.53255/IGFTUBE.WS2015_A.17
Fatigue crack tip damaging micromechanisms in a ferritic pearlitic ductile cast iron	V. Di Cocco, F. Iacoviello, M. Cavallini	https://doi.org/10.53255/IGFTUBE.WS2015_A.18
Fretting in Complete Contacts the use of William's Solution	D. A. Hills, R. C. Flicek	https://doi.org/10.53255/IGFTUBE.WS2015_A.19
Gradient enriched linear elastic tip stresses to perform the high cycle fatigue assessment of notched plain concrete	C. Bagni, H. Askes, L. Susmel	https://doi.org/10.53255/IGFTUBE.WS2015_A.20
Growth of Inclined Fatigue Cracks using the biaxial CJP Model	G. Laboviciute, C. Christopher, M. N. James, E. A. Patterson	https://doi.org/10.53255/IGFTUBE.WS2015_A.21
Interpreting experimental fracture toughness results of quasi-brittle natural materials through multi-parameter approaches	A. Carpinteri, A. Spagnoli, S. Vantadori	https://doi.org/10.53255/IGFTUBE.WS2015_A.22
Load history effects on fatigue crack propagation: Its effect on the R-curve for threshold	X. Zhou, A. Hohenwarter, Th.	https://doi.org/10.53255/IGFTUBE.WS2015_A.23

Presentation title	Authors	DOI
	Leitner, H.P. Ganser, R. Pippa	
Measurement and analysis of fatigue crack deformation on the macro- and micro-scale	D. Nowell, S. J. O'Connor, K.I. Dragnevski	https://doi.org/10.53255/IGFTUBE.WS2015_A.24
Measurement and simulation of strain fields around crack tips under mixed-mode fatigue loading	Y. Hos, M. Vormwald, J.L.F. Freire	https://doi.org/10.53255/IGFTUBE.WS2015_A.25
Multi parameter approximation of stress field in a cracked specimen using purpose-built Java applications	V. Vesely, J. Sobek, D. Tesar, P. Frantik, T. Pail, S. Seitl	https://doi.org/10.53255/IGFTUBE.WS2015_A.26
Multi scale approach for the analysis of the stress fields at a contact edge in fretting fatigue conditions with a crack analogue approach	C. Montebello, S. Pommier, K. Demmou, J. Leoux, J. Meriaux	https://doi.org/10.53255/IGFTUBE.WS2015_A.27
Multi scale crack closure measurements with digital image correlation on Haynes 230	S. Beretta, S. Rabbolini, A. Di Bello, H. Sehitoglu	https://doi.org/10.53255/IGFTUBE.WS2015_A.28
Near Tip Strain Evolution of a Growing fatigue crack	Y. W. Lu, M.L. Zhu, C. Lupton, J. Tong	https://doi.org/10.53255/IGFTUBE.WS2015_A.29
Progress in understanding of intrinsic resistance to shear-mode fatigue crack growth in metallic materials	J. Pokluda, T. Vojtek, A. Hohenwarter, R. Pippa	https://doi.org/10.53255/IGFTUBE.WS2015_A.30
Some experimental observations of crack tip mechanics with displacement data	M. Mokhtari, P. Lopez-Crespo, B. Moreno, M. Zanganeh	https://doi.org/10.53255/IGFTUBE.WS2015_A.31
Some relationships between the peak stresses and the local strain energy density for crack subjected to mixed mode (I-II) loading	G. Meneghetti, A. Campagnolo, F. Berto	https://doi.org/10.53255/IGFTUBE.WS2015_A.32
Specimen thickness effect on elastic-plastic constraint parameter A	G.P. Nikishkov, Yu.G. Matvienko	https://doi.org/10.53255/IGFTUBE.WS2015_A.33
