The second European Conference on  
the Structural Integrity of Additively  
Manufactured Materials

# The second European Conference on the Structural Integrity of Additively Manufactured Materials – ESIAM21

Structural integrity, i.e. the fracture and fatigue strength of additively manufactured materials and components is becoming increasingly important with the technology's transition towards major industrial utilization. The conference provided an overview over current scientific knowledge and stimulated ideas for future research directions in this emerging field. ESIAM21 was the second event of the biannual international conference series held in Europe and worldwide.

## Chairpersons

Filippo Berto	Department of Mechanical and Industrial Engineering, Faculty of Engineering, Trondheim, Norway
Juergen Stampfl	Institute of Materials Science and Technology. Vienna University of Technology - Vienna (Austria)
Jan Torgersen	Department of Mechanical and Industrial Engineering. Norwegian University of Science and Technology (NTNU) – Trondheim (Norway)
Luca Susmel	Structural Integrity at the Department of Civil and Structural Engineering. The University of Sheffield (UK)
Brecht Van Hooreweder	Department of Mechanical Engineering - Production Engineering, Machine Design and Automation (PMA) Section. Ku Leuven (Belgium)

## Welcome message

On behalf of the European Structural Integrity Society (ESIS) TC15, the organizing committee of the Austrian University of Technology Vienna and the Norwegian University of Science and Technology, it is with great pleasure that we warmly welcome all participants to the Second European Conference on the Structural Integrity of Additively Manufactured Materials (ESIAM21).

ESIAM21 addresses an issue of utmost importance in research and industry in Europe and worldwide. With the advent of Additive manufacturing (AM) techniques, the potential to economically fabricate customized parts with complex geometries in a rapid design-to-manufacture cycle became a major driver and hope for Europe's continuing leading role in high quality manufacturing. However, before such benefits can be explored in critical load bearing applications, the basic understanding of the mechanical and functional behaviour of these materials must be substantially improved at all levels, especially in fracture and fatigue performance. The conference will shed light on the basic physical phenomena of fatigue and fracture of AM materials and the development of effective criteria for the design of unprecedented high performing components that shall play a significant role in next generation automotive, aerospace and biomedical application.

The first conference dedicated to this topic, ESIAM19, took place in Trondheim, Norway, and was a key event to bring major European and global players from research and industry together. The great impact ESIAM19 had in fostering scientific and industrial collaboration shall continue with ESIAM21. It is the immediate followup-event and marks the foundation for an upcoming series of international conferences dealing with the topic under the auspices of ESIS TC15. We are very proud to host all of you at this scientific and social event intended to contribute to the future of AM for load bearing component fabrication as well as the strategy of its industrial exploitation.

Peer-reviewed publications from conference contributions and discussions will be published in Procedia Structural Integrity.

We thank all authors for their contributions in advance and we are grateful to ESIS and the members of the international scientific committee for their hard work that will make this conference a success.

We are looking forward to welcoming you at the ESIAM21 conference in Vienna!

Filippo Berto, Jan Torgersen, Juergen Stampfl, Francesco Iacoviello, Luca Susmel and Brecht Van Hooreweder

## VIDEO-PRESENTATIONS

Presentation title	Authors	DOI
Notch effect on the VHCF response of Ti6Al4V specimens produced through the SLM process	A. Tridello, F. Berto, D.S. Paolino	<a href="https://doi.org/10.53254/ESISTUBE.ESIAM21.1">https://doi.org/10.53254/ESISTUBE.ESIAM21.1</a>
Analysis of the behavior of lattice structures under low-velocity impacts: simulations and ...	M. Della Ripa, D.S. Paolino, A. Amorese, A. Tridello	<a href="https://doi.org/10.53254/ESISTUBE.ESIAM21.2">https://doi.org/10.53254/ESISTUBE.ESIAM21.2</a>
A modelling framework for fatigue-life prediction of selective laser melting additive ...	H.O. Psihoyos, Ph.D. Candidate, G.N. Lampeas, Prof. S.G Pantelakis, Prof. Emeritus	<a href="https://doi.org/10.53254/ESISTUBE.ESIAM21.3">https://doi.org/10.53254/ESISTUBE.ESIAM21.3</a>
Fatigue behaviour assessment of additive manufactured Ti-6Al-4V by means of a critical...	C. Ronchel, S. Vantadori, D. Scorza, A. Zanichelli, A. Carpinteri	<a href="https://doi.org/10.53254/ESISTUBE.ESIAM21.4">https://doi.org/10.53254/ESISTUBE.ESIAM21.4</a>
Morphology and weld Strength of a Semi-Crystalline Polymer Produced via Material Extrusion-Based ...	S. Petersmann	<a href="https://doi.org/10.53254/ESISTUBE.ESIAM21.5">https://doi.org/10.53254/ESISTUBE.ESIAM21.5</a>
Bio-Inspired Toughening of Composites in 3D-Printing	J. Stögner	<a href="https://doi.org/10.53254/ESISTUBE.ESIAM21.6">https://doi.org/10.53254/ESISTUBE.ESIAM21.6</a>
Ink development for the fabrication of digital materials with increased fracture toughness	B. Koch, A. Hochwallner, R. Liska, J. Stampfl	<a href="https://doi.org/10.53254/ESISTUBE.ESIAM21.7">https://doi.org/10.53254/ESISTUBE.ESIAM21.7</a>
Influence of finishing in Ti6Al4V AM specimens under VHCF conditions	L. Reis, P.R. da Costa, M. Sardinha, M. Freitas	<a href="https://doi.org/10.53254/ESISTUBE.ESIAM21.8">https://doi.org/10.53254/ESISTUBE.ESIAM21.8</a>
Fatigue damage assessment in AM polymers evaluating their energy release	D. Santonocito, P. Foti, G. Risitano, F. Berto	<a href="https://doi.org/10.53254/ESISTUBE.ESIAM21.9">https://doi.org/10.53254/ESISTUBE.ESIAM21.9</a>
The use of Additive Manufactured Inconel 625 as Bipolar Plate for the High Temperature ...	J. SVendby, O. Bjelland, D. Bokach, B. G. B. Solheim	<a href="https://doi.org/10.53254/ESISTUBE.ESIAM21.10">https://doi.org/10.53254/ESISTUBE.ESIAM21.10</a>
Surface quality and fatigue behavior of L-PBF AlSi10Mg in as-built condition.	R. Konecna, F. Uriati, G. Nicoletto, T. Varmus	<a href="https://doi.org/10.53254/ESISTUBE.ESIAM21.11">https://doi.org/10.53254/ESISTUBE.ESIAM21.11</a>
The relaxation of macroscopic residual stresses in laser powder bed fused stainless steel 316L	M. Sprengel, A. Ulbricht, A. Evans, A. Krom, K. Sommer, J. Kelleher, G. Bruno, T. Kannengieber	<a href="https://doi.org/10.53254/ESISTUBE.ESIAM21.12">https://doi.org/10.53254/ESISTUBE.ESIAM21.12</a>

Recent advances in 3D-printing of continuous carbon fibre reinforced polymers	F.O. Riemelmoser, C. Becker, A. Berndt, R.B. Heim, L.M. Faller, K. Ibrahim, M. Laux, H. Oberlercher	<a href="https://doi.org/10.53254/ESISTUBE.ESIAM21.72">https://doi.org/10.53254/ESISTUBE.ESIAM21.72</a>
Characterization of 3D printed ABS specimens under static and cyclic loadings	C.M. Ferreira, C.M.S. Vicente, M. Sardinha, M. Leite, L. Reis	<a href="https://doi.org/10.53254/ESISTUBE.ESIAM21.73">https://doi.org/10.53254/ESISTUBE.ESIAM21.73</a>
Effect of scan strategy on $\gamma$ -TiAl based composite fabricated by selective electron beam melting	B. Gao, Y. Liang, J. Lin, B. Chen	<a href="https://doi.org/10.53254/ESISTUBE.ESIAM21.74">https://doi.org/10.53254/ESISTUBE.ESIAM21.74</a>
Finish-pass strategy to improve sidewall angle and processing time in FIB milled structures	M.J. Lid, A.B. Afif, J. Torgersen, F. Prinz	<a href="https://doi.org/10.53254/ESISTUBE.ESIAM21.75">https://doi.org/10.53254/ESISTUBE.ESIAM21.75</a>
Additive manufacturing of continuous carbon fiber tubes and experimental investigation of the...	A. Berndt	<a href="https://doi.org/10.53254/ESISTUBE.ESIAM21.76">https://doi.org/10.53254/ESISTUBE.ESIAM21.76</a>

Presentation title	Authors	DOI
Cost-effective Characterization of the Fatigue Behavior of PBF Metals	G. Nicoletto	<a href="https://doi.org/10.53254/ESISTUBE.ESIAM21.77">https://doi.org/10.53254/ESISTUBE.ESIAM21.77</a>
Selective Electron Beam Melted Non-weldable Ni-base Superalloy	B. Chen	<a href="https://doi.org/10.53254/ESISTUBE.ESIAM21.78">https://doi.org/10.53254/ESISTUBE.ESIAM21.78</a>
Residual stresses in AISI 316L and 18Ni300 steels produced by selective laser melting	M.J. Marques, A.C. Batista, J.P. Nobre, F. Fiorentin, A.M.P. Jesus	<a href="https://doi.org/10.53254/ESISTUBE.ESIAM21.79">https://doi.org/10.53254/ESISTUBE.ESIAM21.79</a>
Fatigue strength mechanism under torsional loads of aluminum alloy AlSi10Mg obtained by L-PBF	F. Sausto, S. Beretta, P. Carrion, N. Shamsaei	<a href="https://doi.org/10.53254/ESISTUBE.ESIAM21.80">https://doi.org/10.53254/ESISTUBE.ESIAM21.80</a>
Design of 3D printed polymer-polymeric tribological units made of wear-resistant composite ...	S. Panin, V. Alexenko, D. Buslovich, Y. Dontsov, L. Kornienko, S. Bochkareva	<a href="https://doi.org/10.53254/ESISTUBE.ESIAM21.81">https://doi.org/10.53254/ESISTUBE.ESIAM21.81</a>
Additive Manufacturing of Micro Architecture Composite - Metal Joints for Renewable Energy ...	S. Lotfian	<a href="https://doi.org/10.53254/ESISTUBE.ESIAM21.82">https://doi.org/10.53254/ESISTUBE.ESIAM21.82</a>
